

Extreme Network Customer Configuration Guide

Adentro Overview

Adentro provides consumers with an amazing WiFi experience at their favorite spots, while helping to grow local businesses by better engaging and targeting their customers. By offering a branded captive portal for your guest WiFi network, customers are given the ability to opt-in to targeted messaging sent using the Adentro platform.

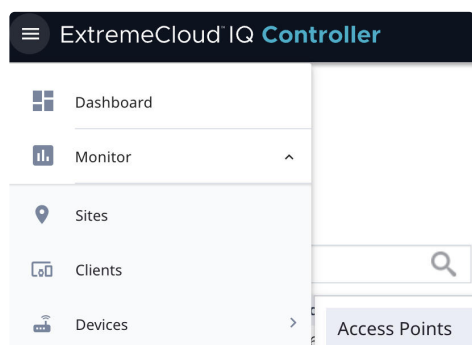

Adentro Configuration

In order to associate your access point(s) with your business information, Adentro will need the MAC address of each individual access point that will be broadcasting the integrated SSID.

**** Disable any other guest networks that are running to achieve the best results with Adentro ****

Without completion of this step, guests will receive a "404" error on the captive portal.

To locate the AP MAC addresses, open the main menu > Monitor > Devices > Access Points.

Make sure the "MAC Address" option is selected in the column selection filter on the right side of the table.

R3 Clients	
Export all data as csv	
Export visible data as csv	
Columns:	
☒	Status
☒	Name
☒	Hostname
☒	Serial Number
☒	Description
☒	IP Address
☒	MAC Address

Export the information, and send it to support@Adentro.com or your account manager.

Controller Configuration

Configure the WLAN

Open the main menu & select Configure > Networks > WLANs.

Select your guest network, or click Add to create a new one.

1. Set the following values to your preference: **Network Name, SSID, Send Successful Login To, & Default VLAN**
2. Set these required settings as follows:
 - a. **Status:** Enabled
 - b. **Hotspot:** Disabled
 - c. **Auth Type:** Open
 - d. **Enable Captive Portal:** Checked / Enabled
 - e. **Captive Portal Type:** External
 - f. **ECP URL:** <https://gateway.wifast.com/extreme>
 - g. **Use HTTPS connection:** Checked / Enabled
 - h. **AAA Policy:** Add a new policy & update the following values:
 - i. Name: Adentro
 - ii. Add a New RADIUS Servers in the Authentication & Accounting sections:
 1. Set the **Server Address** to radius.zenreach.com
 2. Set the **Shared Secret** to 8fc40973252c42e196489d4a16849ff8
 3. Repeat these settings in the RADIUS Accounting Servers section.

[New](#)

Order	Server Address	Port	Retries	Timeout	Trust Point	Type
1	54.69.8.147	1812	3	5		Standard
2	54.68.29.80	1812	3	5		Standard

[New](#)

Order	Server Address	Port	Retries	Timeout	Trust Point	Type
1	54.69.8.147	1813	3	5		Standard
2	54.68.29.80	1813	3	5		Standard

iii. Make sure the new policy (Adentro) is selected for the AAA Policy value.

i. **Default Auth Role:** Guest Access
